

CRI CRI

mod. 300

By virtue of its extreme manoeuvrability and reduced size, this model is ideal for small spaces. Also intended for camper vans and caravans, it combines efficiency with economy.

CONSTRUCTION

Compact, light and minimal, this product is made from plastic technopolymer that is self-extinguishing and anti-UV. Supplied with a practical removable collection tray, it enables quick and easy cleaning. The lamp and electrified grid are supplied with MO-EL's exclusive patented cleaning system, which enables thorough cleaning without dismantling or use of brushes.

All the products in this line are covered by a full 2-year warranty from MO-EL, excluding the lamps, which need to be replaced annually.

LAMPS

The appliance is supplied with one high quality 6W UV-A lamp with an operational range of about 3-5 metres.

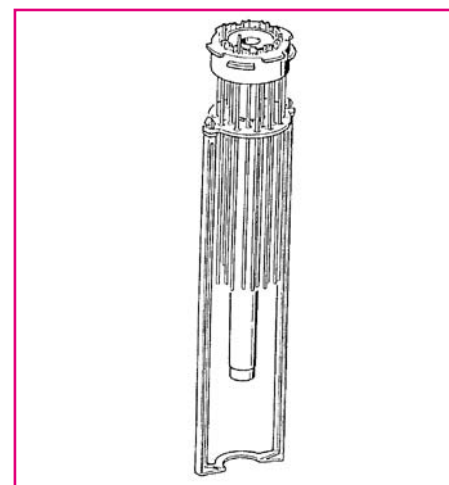

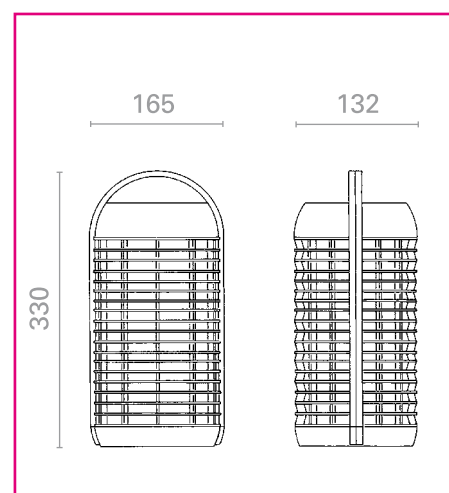

SAFETY

This model is IMQ approved and complies with CE class II standards.

PATENTED PULL STRAP FOR GRID CLEANING

1 - Practical MO-EL patented pull strap for grid cleaning.

Pull strap for grid cleaning.
